NOVUS®

8-PORT POE+ SWITCH
safe and reliable power supply

[PoE 150 m]

Wide range of signal transmission
The switch operates in IEEE 802.2 af/at standard and enables supplying cameras via PoE at distance up to 150 m (UTP cat. 5e). UPLINK 1 X 1000 Mb/s optical port is destinated for connecting fibre-optic SFP modules, that ensure long-distance transmission.

[PoE+]

Supports cameras with heater and IR LED
Cameras with heater and/or IR LEDusually have increased power consumption. The switch offers power supply up to 30 W for each port and up to 110 W for all ports

[4kV]

Surge protection
The switch has built-in protection, which prevents from network surge, e.g. during a thunderstorm

NOVUS IP

3 year warranty

NV-108S/P+ Switch
with output power up to 30 W per port
