In order to take full advantage of the recorder capabilities it is recommended to use NOVUS IP 6000 series cameras. The availability of individual functions (including face recognition) depends on the model of cameras used as well as the software version of the recorder and cameras. In order to create face recognition system please deploy 6000 series cameras with T[®] in the model name only. Detailed data on camera compatibility with recorders and compatible hard drives can be found in the compatibility tables available in the DOWNLOADABLE FILES tab.
