

SPEED DOME CAMERA

for observation of large areas

Observation automation

[8 tours]

The tour function enables to combine previously saved preset commands, patterns and auto-scans into one common cycle. The operator's work becomes easier, because there's no need to change camera's position manually. This way the observation of dispersed areas is more precise and effective.

Installation in any place

[IP 67]

The camera has degree of protection IP 67. It can be mount on the wall, ceiling, pole or building corner, with optional brackets or adapters. The camera has a built-in heater and fan, thus it can operate in a wide range of temperature from -30°C to 50°C

See every detail

[f=3.5 ~ 129.5 mm]

Day-night camera module with 37x optical zoom and 16x digital zoom enables observation and recognition of details with very high precision (f=3.5 ~ 129.5 mm), even in low light conditions.
