

## DEVICE FOR SIGNAL TRANSMISSION OVER COAXIAL CABLE

NV-202VIP

### NV-202VIP

- Active video signal transmitter & receiver (analog and IP) over common coaxial cable
- Transmission distance up to 400 m
- Possibility of image transmission in Full HD resolution
- Easy device mount
- Power supply 12~40 VDC or 9~24 VAC

Perfect solution for modernization of existing CCTV systems  
into newer, supporting TCP/IP protocols

It enables using previous installations to transmit IP signals  
without the need of reconstruction of existing cable infrastructure

Lowers the costs of monitoring systems modernization

**Easy device mount**

Transmission of image from analog and IP cameras  
over common coaxial cable
