

4-CHANNEL NETWORK VIDEO RECORDER

irreplaceable in small, but requiring CCTV systems

[POE]

Easier installation and lower system cost

Built-in Ethernet ports with PoE power supply allow to connect a camera with PoE directly to the NVR, using a single cable and without additional switch or other network accessories

[2 MPX]

„Real-time“ Full HD recording

The NVR supports resolutions up to 1920 x 1080 and has high recording speed up to 30 fps on each channel

[24h]

Full control 24 hours a day

From any place in the world, at any time, you have a remote access to the NVR on your computer by Internet Explorer, and on smartphones and tablets using mobile apps

NOVUS IP

NVR-5304POE Network video recorder with 4 Ethernet ports with PoE power supply
