

5 MPX IP CAMERA

for precise video verification of events and people

No detail is ever missed

[2592 x 1944]

Security at the railway stations is a priority issue, so the cameras working there must provide high quality video material. Thanks to 5 MPX CMOS 1/2,5" image sensor, the NVIP-5DN5040V/IR-1P camera generates sharp and detailed image. Built-in IR LED enables efficient working even in difficult lighting conditions.

Voice messaging

[audio I/O]

The camera has audio inputs and outputs that allow to record sound and send voice messages, after connecting speakers and microphone. The message (e.g. reminder, warning), is audible only within the camera's speakers range, where in fact the event has occurred.

Ceiling, wall, pole and corner mount

[IP 66]

The cameras at the railway stations are exposed to intentional damage. Vandalproof housing protects from physical damage. Degree of protection IP 66 ensures resistance to flooding. The camera can be installed on the ceiling, as well as on the wall, corner or pole, using available mount accessories

NVIP-5DN5040V/IR-1P IP camera
with varifocal lens f=3.3 ~ 12 mm
