15 fps 3 MPX IP CAMERAS

continuous observation for standard solutions

15 fps 3 MPX IP cameras generate detailed image, thus it is easy to identify the potential incident perpetrators in emergency situations.

BECAUSE THE CONFIDENCE COUNTS IN THE MONITORING

15 fps 3 MPX 3000 series cameras

vandalproof: NVIP-3DN3012V/IR-1P, NVIP-3DN3013V/IR-1P, NVIP-3DN3014V/IR-1P

bullet: NVIP-3DN3011H/IR-1P, NVIP-3DN3012H/IR-1P

Low price, high quality

The cameras provide image in 3 MPX resolution at the speed of 15 frames per second (fps) and in 2 MPX and lower resolutions at the speed of 30 fps, so we receive high-quality, detailed video material. The cameras can generate up to 3 different streams simultaneously. Due to a very attractive price, they are a perfect solution for investors with limited budget or for installations with lots of cameras points

[15 fps @ 3 MPX]

Universal, for various applications

The cameras have been adapted to 24-hour observation of rooms inside the buildings, as well as their surroundings – the front doors, gates, playgrounds, parks. Available models are equipped with standard and varifocal lenses (f=4 mm or f=2.8~12 mm), they can operate at temperature from -40°C to 50°C and they are resistant to tough weather conditions (degree of protection IP 66). The NVIP-3DN301xV/IR-1P cameras have vandal proof IK 10 enclosures, which guarantee high mechanical resistance

[IP 66]

Compatible with NMS software

Efficient in low light conditions

Each camera is equipped with the IR LED, which enables operating in darkness and the Wide Dynamic Range function (WDR) allowing the cameras to operate efficiently in modern buildings, with glass walls in the facilities or with intense artificial lighting

[WDR]
