NOVUS®

5000 series IP recorders

compatible with NMS
(Novus Management System)

5000 IP SERIES

NMS supports 5000 series IP recorders
It enables simultaneous connection with lots of 5000 series IP recorders in „live view" and playback mode

NMS Compatible

Lower costs of system construction
In the expanded IP systems with lots of cameras, the standalone 5000 series recorders can be use for recordings archiving, as a cheaper alternative for PC-based recorders. Depending on the needs, you can freely compile 5000 IP recorders with those PC-based under one system

NMS operates like a client station for 5000 series IP recorders
